GM Aftermarket Techline IT Guidelines

Introduction

GM's hardware and software are designed and validated to work within specified hardware and software versions. This document details the ideal computer scenarios with which GM hardware and software will function as designed. Non-compliance could result in undesired results for which GM is not responsible and will not support. General Notes

The guidelines are organized as follows:

- **Good** the minimum acceptable systems capability/components for conducting diagnostics and programming with related GM hardware and software.
- Better the systems infrastructure capability/components that will deliver better performance and security while seeking to maximize the lifecycle of the investment.
- Best the systems infrastructure capability/components that will deliver best performance and security while seeking to maximize the lifecycle of the investment.

NOTE: If you are looking to purchase new infrastructure, systems or solutions, please adhere to the specifications outlined in the "Better or Best" sections.

<u>Hardware</u>

The following section details guidelines for required hardware and software as well as a guide for purchasing new hardware and software. NOTE: GM/ACDelco hardware and software must be utilized on a dedicated computer.

Consumer-Grade versus **Enterprise-Grade**: Most computer manufacturers offer two different grades of computers: consumer-grade hardware intended for home and personal use, and enterprise-grade hardware intended for businesses. While the price of consumer-grade hardware may seem attractive for independent businesses, oftentimes the total cost of ownership ends up being greater due to the limited functionality, higher failure rates, and more complex support.

SUPPORTED	NOT SUPPORTED
Enterprise grade hardware (PCs and Access Points)	Consumer grade hardware (PC and Access Points), Apple or Mac tablets & PCs Non-branded, built by hand or thin client PC
Intel Core i3 / i5 / i7 processors 6 th generation and above	ALL Intel Core i-series 5 th generation and below Processors plus AMD, Celeron, Pentium and Atom processors
Windows 10 Professional, 64-bit	Windows 8.x, XP and Vista Business Windows7 Professional, 32 and 64-bit All Home Operating Systems Tablets running Android or Mac operating systems
Java Run Time Environment 32 bit	All 64-bit versions of Java

For the Techline Service Technician applications (TIS2Web, GDS2, MDI, MDI 2, Tech2Win, and Service Information):

- Requires Local Windows Administrative access for software installation and updates to Windows registry
- Refer to page 9 for a list of recommended firewall and security exceptions
- Recommends one (1) Multiple Diagnostic Tool (MDI / MDI 2) for every PC
- Recommends one (1) battery maintainer for every two (2) Multiple Diagnostic Interface (MDI) tools in use
- Recommends use of Tripp-Lite Keyspan USB to Serial adapter (Model: USA 19HS) for computers without serial ports

Software

	Good	Better	Best
Web Browser	Internet Explorer, version IE11 (with current Service Pack) with the "compatibility view" enabled		
	*See Microsoft Edge note below		
Java	Current 32-bit version of Java Runtime Environment, or the version recommended by each application		
System Recovery	Full Operating System Recovery Package,		
	Ensure the PC manufacturer or reseller provides the necessary recovery software to restore the operating system in the event of a major software failure. (Note: See Business Continuity Section)		
Desktop Anti-Virus	Enterprise Desktop Anti-virus solution that is updated automatically and managed through a centralized console.		

Note: As of October 2020, Microsoft will continue to support Internet Explorer 11 as a web browser for the duration of Windows 10. This is subject to change as Microsoft sees fit, and for the latest updates you can reference this website: https://docs.microsoft.com/en-us/lifecycle/faq/internet-explorer-microsoft-edge. As Microsoft has announced, a shift to Microsoft Edge is under way. GM is working to make sure all applications function in Edge and at some point, Edge will be the primary browser.

Internet Speed

	Good	Better	Best
Speed	100 Mbps	1000 Mbps	1000 Mbps

Note:

The MDI and MDI 2 are not compatible with an open, unencrypted wireless network.

Desktop Security

besittop security			
	Good	Better	Best
PC Virus Monitoring	 Enterprise-grade, antivirus products should be installed on all PCs and configured to automatically perform the following: Download and install most current virus signature updates Actively monitor for viruses Quarantine and eradicate infected files Antivirus solution should include antivirus, anti-spyware, intrusion prevention, application control, spam control and rootkit detection 		
Patch Management	 GM recommends that patch management be performed on every PC to ensure each workstation has current patches. Workstation Management should include remote monitoring of hardware/software failures, down servers, low disk space, excessive CPU usage and excessive memory usage. Install critical security patches within one month of release. 		
Password Protection	excessive memory usage. Install critical security patches within one month of
